

REALIGNMENT OF MAINTENANCE (ROM)

ACLOG

Operator/Crew Level Maintenance

The goal of Operator/Crew level maintenance is sustaining equipment “*mission capable*” at all times, and is both preventive and corrective in nature. “O” level maintenance includes expeditious assessment and maintenance conducted under battlefield conditions. “O” level maintenance normally entails inventory, cleaning, inspecting, preserving, lubricating, adjusting and testing as well as replacing parts and components with common shop tools per Individual Training Standards (ITS) and/or Training and Readiness Events (TRE) and technical publications.

Field Level Maintenance

The goal of Field level maintenance is to return equipment to a mission capable status and is both preventative and corrective in nature. “I” level maintenance actions include inspection/in-depth diagnosis, modification, replacement, adjustment, and limited repair or evacuation/disposal of principal end items and their selected reparable and components/sub-components. “I” level maintenance also includes calibration and repair of Test, Measurement and Diagnostic Equipment (TMDE) as well as fabrication of items, precision machining, and various methods of welding. “I” Level maintenance is performed by specially trained mechanics and technicians per Individual Training Standards (ITS) and/or Training and Readiness Events (TRE) and technical publications.

Sustainment Level Maintenance

The goal of Sustainment level maintenance is to sustain equipment throughout its life cycle by performing major repair, overhaul, or complete rebuild of parts, subassemblies, assemblies or principal end items to include manufacturing parts and conducting required modifications, testing, calibrating and reclaiming. Marine Corps multi-commodity maintenance centers, other service depots, commercial industrial facilities, original equipment manufacturers or a combination thereof may perform depot level maintenance. “D” level maintenance also supports lower level maintenance by providing overflow maintenance services, and by performing on site maintenance services including technical assistance when required.
