Topic Description:

1. **Welcome Presentation.** Presentation welcoming everyone to the conference. State the goals and review agenda.
2. **Preparing for NMCI.** Describes the history of the NMCI program and the status. Also discusses why the Marine Corps is transitioning to NMCI and its importance.
3. **User Awareness.** Provides an overview of how business will change for users upon completion of cutover to NMCI.
4. **Deployment Support Overview.** An extension of the COI Network Architecture. What are the processes, procedures and rules for leaving the network and then re-entering such as when one goes on travel, is deployed, etc.
5. **CAC/NMCI Issues.** Discuss the purpose of the CAC card and how it will be utilized for use within the NMCI network.
6. **NMCI Policy and Guidance.** Describes current NMCI policy and provides a USMC perspective on why the Marine Corps is moving to NMCI. Also includes a discussion on Requirements generation and how the funding for seats was determined and allocated by Major Command.
7. **Marine Corps Community of Interest.** Provides an overview of Marine Corps Community of Interest and how the environment is going to change.
8. **CLIN Updates.** Describes contract CLINs that will affect items that operate off the network. Provides a description of the individual service offerings, associated Service levels, hardware, etc.
9. **NMCI Seat Ordering.** Describes the various type of seats available, their capabilities, procedures for ordering, and rules for using them.
10. **NMCI Transition Activities.** Discusses the reason for moving to NMCI, how NMCI will change the way the User operates, discusses the contract, and discusses the cultural shift to NMCI.
11. **NMCI Legacy Applications.** Overview of the Legacy Application transition/certification process.
12. **NMCI Update.** Brief overview from an EDS perspective on the progress of the transition to include training. Any insights as to lessons learned from their perspective would be welcome.
13. **Site Transition Update/Lessons Learned.** Describes what the program office is doing to support site transition activities. Also provides some lessons learned from recent cutover activities from the NCR region.
14. **Performance Management.** Brief telling the audience basic information regarding service level agreements and the performance management approach.
15. **Moves, Adds, Changes.** Describes how the contract accommodates MACS, how they might be managed, and the costs associated with them.
