- 1. Deployment Support Overview.** An extension of the COI Network Architecture. What are the processes, procedures and rules for leaving the network and then re-entering such as when one goes on travel, is deployed, etc.
- 2. Moves, Adds, Changes.** Describes how the contract accommodates MACS, how they might be managed, and the costs associated with them.
- 3. CAC/NMCI Issues.** Discuss the purpose of the CAC/PKI card and how it will be utilized for use within the NMCI network.
- 4. Marine Corps Community of Interest.** Provides an overview of Marine Corps Community of Interest and how the environment is going to change.
- 5. NMCI Legacy Applications.** Overview of the Legacy Application transition/certification process.
- 6. Lessons Learned.** Describes Lessons Learned from Quantico Cutover and any precautions that may need to take place to reduce problems for MARFORRES.
- 7. Defense Messaging System (DMS).** Describe the issues relative to how DMS will be affected by NMCI any new processes that may need to be implemented.
- 8. Acquisition Oversight (Seat Ordering).** Describes the various type of seats available, their capabilities, procedures for ordering, and rules for using them.
- 9. SLA's/Performance Management.** Brief telling the audience basic information regarding service level agreements and the performance management approach.
- 10. Invoice Processing and Budget Issues.** Provide overview of invoicing under NMCI and any budget issues associated in the movement of funds.
